Check list before commencing work

- ✓ Check FSI of the plot
- ✓ Check permissible built up area as per FSI
- ✓ Check the soil conditions before commencing work
- ✓ All necessary approvals should be in place
- ✓ Appointment of contractor
- ✓ There should not be any tree cutting on the site.
- ✓ Drawings made as per N.B.C, also local byelaws to be crosschecked.
- ✓ All drawings must be consulted with structural engineer before construction

DeZine Tip:

'Salvaged materials from demolition sites or local flea market add inexpensive character to a home without exorbitant cost'
